Dr. Nancy Sutton Pierce is the creator of Conscious Living Concepts™. This includes Conscious Living Yoga™ & the *Yoga To Go*™ Series, The Conscious Living Show™ & Conscious Living Sexuality™ Intimacy Coaching. All have designed to help couples and singles around the world awaken to their full potential and enjoy living an authentic life, including a healthy sexual life.

Earning her registered nursing degree in 1983 was the beginning of what has proven to be an eclectic career in the health field. Early work in obstetrics ignited Dr. Nancy's passion for women's health and happiness, which remains at the heart of her work today. As an entrepreneurial woman, Dr. Nancy owned an outpatient diabetes education & care center, where she provided health care for 13 years as a Diabetes Nurse Specialist. Her experience operating her own practice led her to her next phase, building a Conscious Living Yoga™ Center and, as a Certified Yoga Therapist, working with special needs groups such as PTSD, Pregnancy, Ortho-Neuro-Spine disorders, emotional stress, body dysmorphia, depression and more. In addition to the healing aspects, she and her husband (Dr. Mark Pierce) began to share their passion for passion by instituting monthly Yoga Date Nights for Couples, where they inspired couples to rekindle their romantic spark and learn the art of sensual/sexual/erotic communication all while fully clothed.

The yoga-teaching mat has proven to be a great source of guidance for Dr. Nancy personally. Between the yoga mat and her weekly radio show, she has honed her skills as an educator and intuitive leader. Dr. Nancy has been educating her clients and students about health and wellness, and personal responsibility for both. She has brilliantly merged her western medical knowledge with the eastern philosophies of body/mind/spirit integration. The best of both worlds are now available to you through her teachings.

Dr. Nancy will guide you safely through any topic or practice, all the while gently reminding you to listen to your inner teacher above all else. The skills you learn from Conscious Living Yoga will assist you both on and off your yoga mat. Taking the yoga out into our lives is what Dr. Nancy's teaching style emphasizes. Her favorite phrase, living a "designer life", is applied to all aspects of one's life experiences. Dr. Nancy has a fresh and open way of delivering even the most tender of topics to her audience with humor and solid easy to understand facts.

In 2010 Dr. Nancy was asked to write a Sex & Relationship column for an online news magazine. Serendipity went to work here. This opened the door to creating an Erotic (Erotikos) Film Festival in 2012 where she met her now friend and mentor, Dr. Ava Cadell. Through Dr. Cadell's consistent encouragement Dr. Nancy enrolled and earned her Doctorate in Human Sexuality in the fall of 2015. From a background as a nurse, educator, healing practitioner, author, sex & relationship coach, and radio talk show host, she has emerged a Sex Doctor who, with her humanistic approach, now helps people embrace their unique expression of their authentic sexuality around the world.

You may also learn about Dr. Nancy's Conscious Living philosophy by tuning into her weekly radio show "[The Conscious Living Show](#)" available now on [iTunes](#) or reading her [blogs](#).

Helping women and men around the globe understand their own personal sexuality without shame or fear is one of Dr. Nancy's greatest achievements. Her own personal beliefs surrounding sexuality are comfortably grounded and open to all possibilities; combined with her yogini non-judgmental attitude, she becomes a safe place for people to comfortably share and receive valuable information to enhance the quality of their lives.

***As You Desire Column:*** In the summer 2010 I was approached and asked to write a column on sex in our local on-line newsmagazine. It is a difficult topic because the author exposes some of her personal beliefs and is open to judgments. I considered the risk, agreed to write the column, and the response has been overwhelmingly positive.

In health care our achievements occur one person at a time. The following is a comment from my *As You Desire* column titled, "*As You Desire: Taking Pleasure Into Your Own Hands*":

*"Not to beat this dog to death, however, I just came across Nancy's article. I wish (as a child) someone had told me to simply "take it to my room." Perhaps I was going through a difficult period after my father died, however, it didn't*

*help that my mother was called to the school nurse because I was “playing with myself” during school films in third grade. I was physically “examined” by the nurse with my mother in attendance and the instructions were to wash me at home with baking soda and water. Nancy’s article released much guilt. Really, I think the Internet and our ability to communicate and share is a wonderful thing.”*

## Personal Information

*“Learning much from a failed first marriage, I have now been married to the man of my dreams since 1993 – Mark Pierce, MD. We successfully blending our family of three kids and raised them into incredible adults – and now are being delighted by the pure love of our (four so far) grandchildren!” Dr. Nancy Sutton Pierce*

Nancy is very committed to doing what it takes to create a life of health, happiness and well-being – both she and her husband practice and teach yoga. They share their passion for life through their work and their play; occasionally blurring those lines because they are both so much fun.

She enjoys what she calls a continuously evolving “designer marriage”. Because of their openness about this, they find themselves counseling struggling couples and singles in the art of loving communication; leaning to ask for what you want, stand in your truth, express your authentic self, all from a place of loving kindness.

They also fully believe sex is fun – and that we don’t always need to take ourselves so seriously.

*“I have a very holistic approach to my work. I don’t teach skills, I teach people. This requires meeting them exactly where they are and supporting their journey in the direction they choose to go.” Dr. Nancy Sutton Pierce*
